

 **zeleninovo**
taste and freshness in one place

From carefully selected growers to shelves.

Welcome to Zeleninovo.

We have been combining taste and freshness in vegetable and fruit distribution for over

20 years.

We know what the Slovak vegetable market needs. We can offer it in an even better form and quality, and with various benefits.

In cooperation with our long-standing growers, we manage more than 1,000 hectares of land in Slovakia. Our growers hold various certifications such as GLOBALG.A.P. and GRASP.

We want to bring not only quality produce to the market, but also various innovations.

We provide full service. From the smallest step to the biggest.

Cultivation

We arrange the cultivation of vegetables and fruits according to our customer's requirements.

Storage

The priority is to keep the produce fresh and undamaged throughout the storage period.

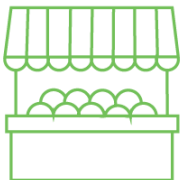

Distribution

We carefully transport the produce from the grower to the final consumer.

Logistics and packing

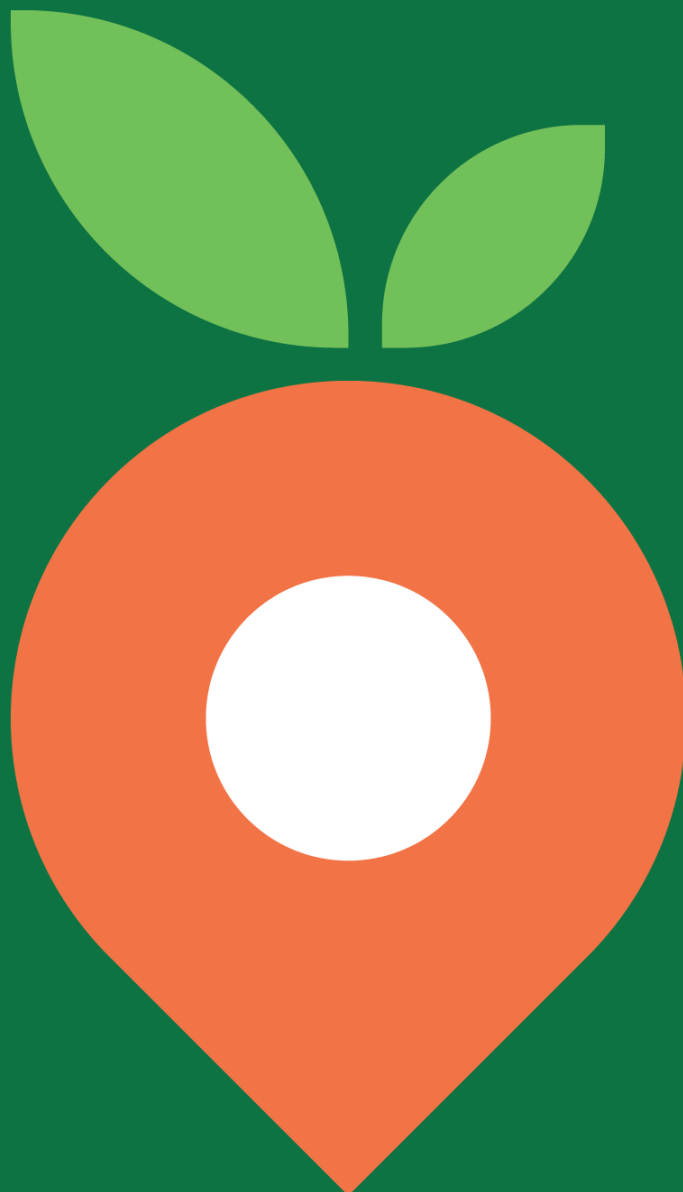

Fruits and vegetables are prepared and packed according to specifically agreed requirements.

Sale

We bring the finished product to the shelves ready for sale.

Our aim is to ensure that the vegetables grown in the fields, greenhouses or polytunnels are delivered in high quality and as quickly as possible to commercial units, so that everyone can enjoy their freshness.
